SUMMARY

Full-Stack Developer with a strong foundation in Next.js, Typescript, React, and Python. Proven track record of building user-centric applications, including a SaaS platform for job tracking and AI-driven legal-tech solutions. Recently completed a high-impact internship at Temasek Polytechnic, delivering production-ready code and optimizing application architecture. Passionate about leveraging modern frameworks to solve real-world problems.

WORK EXPERIENCE

Full-Stack Developer (Contract)

April 2026 - Present

Temasek Polytechnic, Singapore

- Architected a privacy-first AI agent using OpenClaw and local Ollama models to automate legal onboarding for migrant workers, securing sensitive data by eliminating reliance on external cloud models.
- Engineered a dynamic, AI-driven interview interface that intelligently gathers necessary legal information directly from end-users, significantly reducing manual administrative workflows.
- Built an automated document generation pipeline that processes locally-inferred interview data to instantly compile and format legally accurate affidavits.

Full-Stack Developer Intern

Sept 2025 - March 2026

Temasek Polytechnic, Singapore

- Engineered a full-stack legal-tech SaaS using Django and JavaScript, enabling law firms to efficiently retrieve, analyze, and summarize case laws.
- Developed a specialized "Legal Search" engine capable of indexing over 10,000 Singapore case laws, implementing custom relevance scoring and decision date sorting to significantly accelerate case retrieval workflows for legal professionals.
- Engineered an interactive RAG-powered Chatbot using the RAGFlow SDK, enabling users to perform natural language queries and receive real-time, context-aware summaries with direct citations to source documents.

RELEVANT PROJECTS

Flux - Job Application Tracking SaaS

- Engineered a full-stack SaaS platform using Next.js and Supabase, designing a centralized workflow that replaces manual spreadsheets and streamlines the application process for job seekers.
- Developed an interactive Kanban board interface, implementing drag-and-drop state management to allow users to visually track and organize the lifecycle of applications (from "Applied" to "Offer").
- Implemented secure user authentication using Supabase Auth, creating protected routes and persistent sessions to ensure safe access to private job data.

Legal Onboarding Agent

- Developed an AI agent to automate legal onboarding for migrant workers, streamlining case management and helping pro bono clinics scale by eliminating language and administrative barriers.
- Engineered an AI-driven intake flow that dynamically adapts interview questions and translates native-language inputs into English in real-time, automatically generating structured case summaries and draft legal affidavits.
- Architected a secure, multi-tenant backend system that isolates user sessions by Telegram ID and automatically extracts and files uploaded evidence, saving lawyers hours of manual administrative intake time per case.

EDUCATION

Diploma in Information Technology

Apr 2023 - March 2026

- CGPA: 3.75/4.0 | Diploma with Merit
- Director's List (Year 1 & 2) - Ranked in top 10% of the cohort.

SKILLS

Languages	JavaScript, TypeScript, Python
Frontend	HTML5, CSS, React.js, Next.js, TailwindCSS, shadcn/ui
Backend	Node.js, Express.js, Django, Prisma, Supabase, Firebase
Database	PostgreSQL, MongoDB, MySQL
AI & Tools	RAG, OpenClaw, OpenRouter, Docker, Git, GitHub, Postman, Ollama, AWS
